
SAVANSYS PRICE LIST

Generic Cost Models

Generic cost models are calibrated to industry data. The price includes limited calibration and customization. Generic cost models are provided on a yearly subscription basis. A corporate license includes unlimited users, Process Flow details (all assumptions visible), and one year of use.

Model	Corporate License*
Flip Chip - Substrate & Assembly	\$10,000
Wire Bond - Substrate & Assembly	\$10,000
Fan-out WLP	\$10,000
Panel-level Fan-out	\$10,000
2.5D Packaging	\$15,000
3D Packaging	\$15,000

*Price listed is standard annual renewal fee. All models have an additional \$2.5K for set-up in first year, except for the 2.5D and 3D Packaging models.

Custom Cost Models, Reporting & Projects

SavanSys offers the option to scope a report, project, or cost model on a fixed price or hourly basis.

Custom cost models are constructed to model your specific technology, process, or supply chain, and include a perpetual license. Development price depends on the complexity of the cost model and typically requires 60 to 80 hours.

Custom reporting is a process where SavanSys consultants generate either a) a one-time template that can be updated internally by the customer, or b) a report to be delivered at set intervals. Hours required depend on the complexity of the report and the update process and frequency.

Cost modeling projects are an alternative to licensing software. SavanSys consultants carry out the required cost trade-offs and analysis, and the customer receives a detailed report. Cost modeling projects typically range from 40 to 80 hours.

Category	Price
Consultant	\$250 per hour
Senior Consultant	\$300 per hour
Custom Cost Model License	\$10,000
Fixed Price Software, Report, and Project	\$10,000 to \$50,000
